

A NEW BEAUTY TREATMENT FOR MODERN BATHROOMS

A BOOK OF DEMONSTRATIONS

No. 10 in a series published by THE REPUBLIC BRASS Company
and its subsidiary GRABLER REPUBLIC, Inc. CLEVELAND, OHIO

Today

STYLE

*rides the
Crest of the Wave*

STYLE is the drum major
in today's moving pageant
of merchandise.

Motor cars roll to the mar-
ket-place under the banner
of style.

Radios captivate the fancy—
excite the buying urge with
cabinets styled in the modern
mode.

Table cutlery, bath towels, fountain
pens, alarm clocks—all have suc-
cumbed to the dictates of style.

Even the humble kitchen now proudly
boasts new beauty with colorful, mod-
ish floor coverings and the modern
bathroom is a tiled temple of beauty—
radiant in the impressive blending of
its color tones—resplendent in its
gleaming fixtures.

Never have beauty and utility been so
happily wedded as in modern bath
fixtures. And never have beauty of de-
sign and sound mechanical construc-
tion been more perfectly united than
in the Republic Fixtures illustrated on
the following pages.

The Republic

TRUART LINE

*A style leader
among fine bathroom fixtures*

THE primary qualification of a style leader is good taste.

The Truart Fixture illustrated, we believe, possesses this essential attribute to a noteworthy degree.

With good taste as a foundation we have added artistic ability—impressively exemplified in the classic lines and graceful curves of the Truart.

Finally, to complete its captivating charm we have clothed it in a chromium finish that borrows the beauty of platinum.

The eminently good taste of the Truart fits it for companionship with the very finest of bathroom appointments and equipment.

The Truart Bath and Shower Fixture—
No. D-1930.

Patent Numbers 1,187,477; 1,579,503;
1,332,793; 1,556,406; 17,034.

The Truart
Lavatory
Fixture—No.
D-1610.

Bath, Shower and Lavatory Fixtures

An artist is judged by his **SKILL** in using color

Patent Numbers 1,332,793
1,579,503; 1,556,406; 1,647,984;
1,187,477; 17,034.

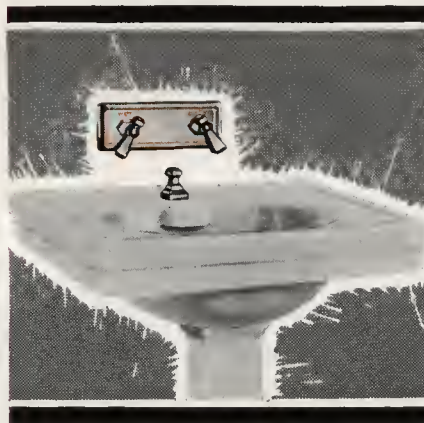

THE garish circus poster assaults the eye with its bold blatancy.

The artistic etching delights the eye with its harmonious blending of colors.

Creating color charm is a matter of skill, artistry, restraint.

In designing the Ambassador Fixture, Republic designers have employed color with *telling* effect. There's just a band of it skirting the wall plates—giving life and lustre to the fixture by vivid contrast.

This color band is available in six shades—vermilion, crimson, dark blue, light blue, green, orange—and in black—affording virtually unlimited scope for the achievement of many novel and harmonious color treatments.

The Republic
AMBASSADOR Lavatory
Fixture—No. 937

Patent Numbers, 1,647,984; 1,556,406

The AMBASSADOR Swing Spout Kitchen Sink Fixture
No. 527½.

REPUBLIC

A delightful study *in* **CONTRASTS**

A JADE green vase on a deep-toned walnut table.

A white sail against the blue expanse of water.

CONTRAST. Creator of charm. Arch enemy of monotony.

In the Republic Nubian Fixture you see contrast exemplified in a striking manner.

The wall plate is ebony black. The metal parts are chromium plated. The ensemble is delightful—an impressive study in contrasts.

A Nubian-equipped bathroom is bound to inspire enthusiasm where distinctiveness is desired.

The Republic NUBIAN Lavatory
Fixture No. 935-P.

Patent Numbers 1,647,984; 1,556,406

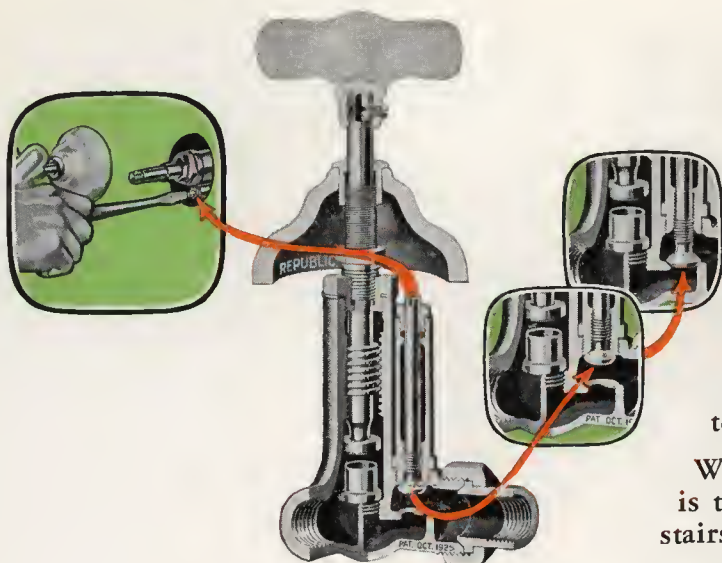

The Republic NUBIAN Swing Spout Kitchen Sink Fixture
No. 526 1/2.

Patent Numbers 1,332,793;
1,579,503; 1,556,406; 1,647,984;
1,187,477; 17,034.

Bath, Shower & Lavatory Fixtures

REPUBLIC

Integral Stop Valve

No. 1110

TODAY'S public is a *convenience-buying* public.

That's one dominant reason why the Republic Integral Stop Valve will appeal to home builders and buyers.

With this patented valve installed, gone is the necessity of running up and down stairs to turn water off and on.

Control of volume is maintained at main valve body.

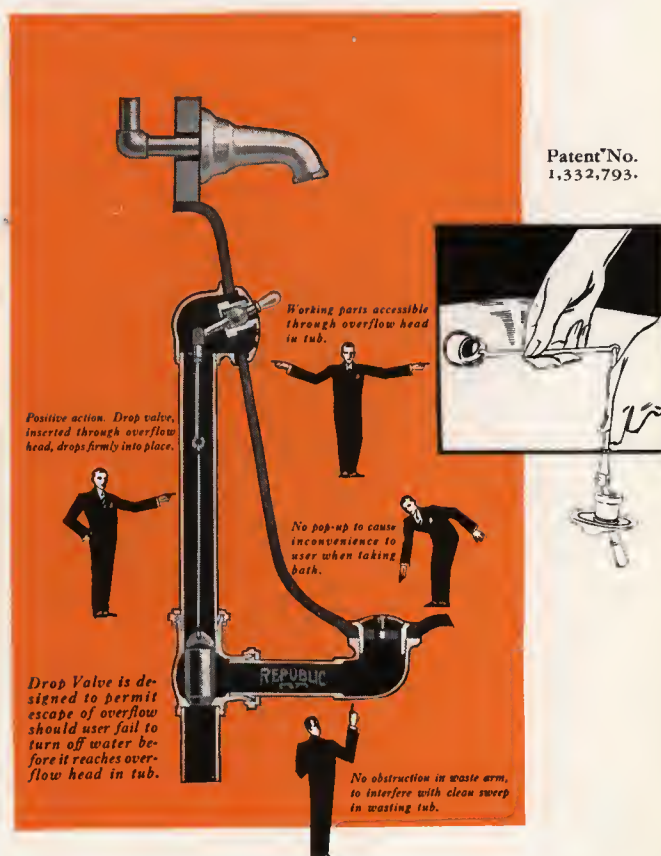

Demonstrate this time, energy and step saver to Mr. Buyer.

The REPUBLIC Trip Lever Drain

THE Republic Trip Lever Drain is an active, alert drain. Why? Primarily because of that generous-sized, unobstructed channel or waste arm shown in the illustration.

No chance for waste waters to tarry in tub—no lazy draining with the Trip Lever. Like the swift movement of a mountain stream, the waste waters sweep through the waste arm of the Trip Lever Drain.

Simple in construction—free from mechanical “doodads”—that's why the Trip Lever Drain is 100% dependable.

"SHOES Cut to \$5.48!" Intelligent buyers aren't fooled by cheap price baits. They know that the "mileage value" given by a higher-priced pair made by a reputable manufacturer will make the \$5.48 pretenders dear at any price.

The most important ingredient of any product is the honesty and reputation of the maker. In Republic Brass Goods we constantly strive to a standard of quality that will do full justice to the mark "Republic" that appears on every piece of Republic merchandise.

Republic CATALOG "D"

HERE'S the finest "exhibition of brass fixtures on paper" that was ever held. 180 pages of impressive illustrations. Life-like pictures of bath, shower and lavatory fixtures. Many pages in attractive colors.

If you would become familiar with the "de luxe" in fixtures then you must have a copy of Republic new catalog on file. Just ask for catalog "D."
